	Examiner Tuan D. Nguyen	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 5,519,783 (Kumar).

Regarding claims 1, 3, Kumar discloses an earmuff structure (figures 1-5) for headset or ear protector, comprising: two earmuff shells (3,4) being provided at respective inner surface with forward projected and internally threaded seats; a circuit board (35) mounted in each of said earmuff shells and having bores provided thereon to correspond to said internally threaded seats on inner surfaces of each said earmuff shell; and first and second speaker mounting plates (10) separately assembled to said two earmuff shells.

Kumar does not disclose internally threaded bars formed thereon corresponding to said internally threaded seats on inner surfaces of said two earmuff shells.

However, the threaded bars or screws are well known in the art.

Art Unit: 2614

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use these well known threaded bars or screws for holding or mounting means.

Regarding claims 2 and 7, Kumar also shows wherein said first and second speaker mounting plates are provided at respective central area with a central hole for receiving a speaker therein (see figures 4, 5).

Regarding claims 4 and 5, Kumar further discloses wherein said first speaker mounting plate is provided at a front surface with two battery compartments (22,27) located at two outer sides of said central hole.

Regarding claim 6, Kumar further shows wherein said two battery compartments formed on said first speaker mounting plate have battery conducting electrode plates pre-mounted therein; and said battery conducting electrode plates being electrically connected to said circuit boards by plugging terminals on conductors into corresponding sockets on said circuit boards (see figures and 5).
